

Sharps Container Policy

Needles and anything with blood on it must be disposed of in the home's Sharps Container.

Once the Sharps Container is 75% full, the PA must close the top and bring it to the Agency Nurse.

The Agency Nurse will place the used Sharps Container in a Biohazard bag, tie it and place in a Red Tote, tie the Red Tote, and send back to Hutcheson Pharmacy.

Hutcheson Pharmacy will dispose of the Sharps Container per protocol and regulations set forth by the State and Government.
